

The Sound You Want Where You Want

LDNE Assembler® steering diagram for Dubai Festival City Mall

Dubai Festival City Mall – Festival Square with Messenger® Line Array and Bass Array®

ATEIS Middle East FZCO, P.O. Box: 293640 Dubai United Arab Emirates

ATEIS

The Bass Array is one of the latest technical innovations of ATEIS International and has proven to be a real add-on to the third generation Messenger® Line Array.

The combination of Messenger Line Array and a Bass Array offers the perfect solution for speech and musical performance in any difficult acoustic environments.

By applying the same patent Messenger® technology to the Bass Array, make it the first array of its kind that carries bass frequencies over long distance and keep the signal deviation within 2dB over 100m.

With a total length of 14meter and only 8 Active Bass Cabinets, lobe steering and directivity control can be achieved down to 35Hz up to 400Hz with vertical angle as small as 10 degree.

"ATEIS is scaling new heights of innovation and we are proud that you are part of this"
