ATEIS Voice Evacuation delivers High Security Sound that protects lives in the course of Evacuation.

The new NFPA72:2007, BS 5839 Part 8:2008 and the latest EN54: 16, demands for STI "Speech Transmission Index" sound intelligibility measure of minimum 0.5 on scale of up to 1.0.

With more than 550+ projects in the Middle East, ATEIS Voice Evacuation System is the first choice for clients seeking High Intelligibility and Quality Sound complying with the latest International Standards and Local Authority Requirements.
